Description	This use case details the steps to follow for setting-up Kongu Cooperative Bank Core Banking System (KCB CBS) account for the first time.	
Actors	Customer	
Includes	Bank Account Details Verification, OTP Verification and Audit Logging.	
Extends	Login	
Pre-Conditions	User should already have an active bank account in Kongu Cooperative Bank	
Basic Flow		
1.	User enter Kongu Cooperative Bank Website and enter the Login screen.	
2.	In the Login Screen user clicks the “ New User ? Register here ” link	
3.	System navigates the user to the first time setup screen	

4.	In the first time setup screen, user enters the below details and click the submit button • Bank Account number • CIF Number • Branch Code • Registered Mobile Number • Facility required • Captcha	
5.	System navigates the user to the OTP Screen, where the user enters the OTP received in his/her registered mobile number.	
6.	If the user entered OTP is correct, the user will be navigated to the ATM Card validation screen.	
7.	In the ATM card verification screen, the user enters the Cardholder Name, Card Number, Expiry Date, and ATM PIN for validation.	
8.	On successful validation, the user is navigated to the Credential Setup screen, where they create a Username and Password for KCB CBS online banking.	
9.	Upon successful completion, the user is registered for KCB CBS Internet Banking and redirected to the Login screen.	
Post Conditions	User has successfully set-up his/ her user name and password to login to the KCB CBS Platform.	
Alternative Flow & System Messages		
AF01	Bank account already registered: If the user has already registered for online banking then an error message will appear asking the user to login directly.	
	<u>System Message:</u> “Your account is already registered for internet banking, Please login directly”	

AF02	Invalid Bank details : If the user enters an incorrect Account Number / CIF / Branch Code, the system displays an error message.	
	<u>System Message:</u> “Invalid bank account details.”	
AF03	Blank fields: If the user clicks the submit button without filling any field or all fields, the system displays an error message,	
	<u>System Message:</u> “Some of the fields are blank. Please complete all required fields.”	
AF04	OTP Not Received / Expired • If the user does not receive the OTP within the validity period, they can click “Resend OTP”. • A new OTP is sent to the registered mobile/email.	
	<u>System Response:</u> • Once the OTP is sent the system displays the message “OTP sent successfully.” • If the OTP has expired then the system should display the message “Your OTP has expired. Please request a new OTP.”	
AF05	Invalid OTP • If the user enters an incorrect OTP, the system displays an error message • After 3 failed attempts, the OTP session is terminated, and the user must restart the registration process.	

	<u>System Response:</u> Show the error message “ Invalid OTP. Please try again. ”	
AF06	Invalid ATM Card Details • If the entered Cardholder Name / Expiry Date / PIN is invalid, the system displays an error message, User retries until correct details are provided.	
	<u>System Message:</u> “ Invalid ATM Card details. ”	

Login & Two Factor Authentication Screen:

UC-LOG-02	Description	Ref
Name	Login Screen	
Description	This use case details the steps to follow for Logging into the Kongu Cooperative Bank Core Banking System (KCB CBS) Web platform.	
Actors	All users of the KCB CBS Web Platform (Customer, Branch Manager, Admin, Loan Officer)	
Includes	Credential Validation, OTP verification, Session Creation and Audit Logging.	
Extends	Forgot Password, First time Setup, Two Factor Authentication and Logout	

Pre-Conditions	• Users must have an active bank account in the Kongu Cooperative Bank. • Users must have signed up successfully in the KCB CBS web platform. • User must have a valid user name and password.	
Basic Flow		
1.	Once the user completes the First-Time Setup process, they are redirected to the Login screen.	
2.	On the Login screen, the user enters their Username and Password, then clicks the Login button.	
3.	The system validates the entered credentials. • If valid, an OTP is sent to the user's registered mobile number. • The user is then redirected to the Two-Factor Authentication (OTP) screen.	
4.	On the Two-Factor Authentication screen, the user enters the OTP received on their registered mobile number, then clicks the Submit button.	
5.	System validates the OTP, If valid the user is redirected to the Dashboard, with menus and features displayed according to their role-based privileges.	
Post Conditions	• The user has successfully logged in to the KCB CBS platform. • The user can now update their profile details, such as notification preferences (email/mobile), manage their password, and carry out the banking functions permitted for their role.	
Alternative Flow & System Messages		

AF01	Resend OTP • If the user does not receive the OTP within the time limit, they click “Resend OTP”. • The system generates and sends a new OTP to the registered mobile number.	
	<u>System Response:</u> Once the OTP is sent the system displays the message “OTP sent successfully.”	
AF02	Invalid OTP When the user entered OTP is invalid then the system displays the error message	
	<u>System Response:</u> Show the error message “Invalid OTP. Please try again.”	
AF03	Account Locked (After Multiple Failed Login Attempts) • If the username/password is entered incorrectly three times consecutively, the system locks the account for security. • The user can either: ♦ Wait 30 minutes for the account to be automatically unlocked, or ♦ Contact the bank branch to request manual unlocking.	

	<u>System Response:</u> User enters invalid account credentials or enters OTP three times. “Your account has been locked due to 3 failed attempts. Please re-enter the credentials after 30 minutes or contact your bank branch.”	
AF04	OTP Expired If the user enters the OTP after the validity period (i.e., 3 minutes), the system prompts them to request a new OTP.	
	<u>System Response:</u> “Your OTP has expired. Please request a new OTP.”
